

Aseismic Design and Testing of Nuclear Facilities, Technical Reports Series No. 88, International Atomic Energy Agency, Vienna, 1968. \$1.00

This report was prepared by a panel of international experts convened in Tokyo, June, 1967. The earthquake problem is described, the state of the art for earthquake design of nuclear reactors is described, and recommendations are given for needed research. The report can be ordered from the National Agency for International Publications, Inc., 317 East 34th Street, New York, N. Y. 10016.
